En Tout Cas Pty. Ltd.

The courts have lived up to our expectations. Most members enjoy the surface and the responsiveness of the polyclay surface. There are no known adverse issues held by any playing member which is quite an achievement! The courts are marginally slower than the old entoutcas courts but as time goes on and the surface compacts more, we expect the surface to speed up.

The job was done most efficiently and professionally and I'm sure the general committee of the Doutta Galla Tennis Club would have no hesitation in recommending the polyclay surface and En Tout Cas Pty Ltd to other tennis clubs.....in fact we do! It was an excellent transformation.
