

STAR OF THE SEA COLLEGE

31 May 2004

TO WHOM IT MAY CONCERN

**RE: EN TOUT CAS
MULTI-PURPOSED SPORTS AREA**

Star of the Sea College decided to develop a grassed area and an asphalt basketball court into a multi-purpose sports area.

Our initial thoughts were to have a synthetic grass area.

En Tout Cas were able to provide assistance in the development of the project including strategies to solve a major flooding problem.

The College has achieved a terrific multi-purpose sports area that includes four tennis courts on synthetic grass (with rubber matting underneath).

En Tout Cas and its workers acted in a most professional manner establishing what was required. I would highly recommend this company.

Yours sincerely,
