**Re: Business reference – En tout cas**

Woodlands Primary School contracted En tout cas to redevelop the school oval which measures six thousand square metres.

The contract was well tendered for and the prices received were very competitive.

En tout cas was selected because of its professionalism, detail contained in its submission and enthusiastic presentation.

The project took approximately six weeks to complete.

The School Council and I could not be happier with the results. Everything which En tout cas and Bernard Evans promised was delivered. It is a quality synthetic turf oval, delivered on time and on price. All specifications were met.

The relationship between the school and En tout cas was harmonious throughout the construction. Any small problems were sorted out very quickly at our site meetings and the few items which required attention were corrected professionally.

I have no reservations in recommending En tout cas and Bernard Evans to other organisations who require similar synthetic grass requirements.

Regards
