

CUSTOMER SUCCESS STORY

NEWPORT LAKES PRIMARY SCHOOL, VICTORIA

A Bright and Vibrant Upgrade!

Having already worked with Grassports in the past, receiving recommendations from other schools and given how long the original surface we installed has lasted, Newport Lakes Primary School knew not to look any further than Grassports Australia!

With 500 hours of hard work, 1,144m² of Australian made synthetic grass (Court Turf PE) and approximately 28 tonnes of sand Grassports has transformed the worn play area at Newport Lakes Primary School into a vibrant and fresh zone for all their students to play on and get active outside. The multi-purpose space is designed to play basketball, netball and bat tennis.

Grassports also incorporated a large 15 square multi-coloured snake for extra enjoyment for the kids!

Newport Lakes Primary School is beyond pleased with the results and hopes to have us in for more works to complete their school oval.
