

A PICKLEBALL COURT TO COMPLETE ONE STUNNING PROPERTY IN SORRENTO

Grassports recently partnered with Chisholm Constructions to complete a standout feature for a high-end residential build in Sorrento - a custom pickleball court designed to blend sport and style.

The court features a two-tone green Laykold acrylic surface. To elevate the visual appeal and create a seamless transition into the landscaped surrounds, we installed Synlawn 'Lush' synthetic turf at either end of the court, adding a premium, natural-looking finish.

This installation reflects the growing demand across Victoria for bespoke pickleball courts in homes, clubs, schools, and commercial projects — and Grassports is proud to lead the way in delivering tailored, high-quality solutions.
